Finishing

Product Description:

G10 Finishing Compound is ideal for removing light scratches or swirl marks, especially on darker colours. Will also restore older paintwork and bring the true colour back.

Features:

Leaves glossy finish and ultimate shine.

No need to use water.

Brings the colour back to discoloured paint.

For hand or machine application.

Advantages:

Gives paintwork a perfect finish quickly.

Splatter is reduced.

Glossy, true colour finish achieved.

Versatile.

Benefits:

Saves time and therefore money.

Less clean up time.

Customer satisfaction.

Saves money.

Application Guide:

Use with:

Advanced G Mop Polishing Foam (2 pk)

Advanced G Mop Back Plate

Advanced G Mop Finishing Cloth

AGM-PF

AGM-BP

FC-3

Finishing

G10 Finishing Compound

Directions for Use

For best results by machine follow these recommended steps:

- ⌘ Apply a small amount of G10 to the surface (about the size of the bottle flip top).
- ⌘ Attach the Advanced G Mop Polishing Foam to a polishing machine and set to a free running speed of 1500-1800rpm.
- ⌘ Polish with light pressure and the Polishing Foam flat on the surface until desired gloss level is achieved.
- ⌘ Remove any residue with a Farécla Finishing Cloth.

For best results by hand follow the steps above BUT:

- ⌘ Apply G10 to the surface using a clean, soft polishing cloth, NOT a cotton cloth as this is too coarse.
- ⌘ Rub over the area using either firm circular or backwards and forwards movements.
- ⌘ The direction of these movements should be changed to ensure a smooth and even coverage of the area.
