

# TABI DISPENSER

## ACCESS TO FREE MENSTRUAL PRODUCTS

Dispenser dimensions: 213 x 302 x 93 mm (w x h x d)

### Tabi-dispenser

- **Capacity:** Suitable for approx. 40 sanitary towels and approx. 160 tampons in normal absorbency
- **Surface:** Stainless steel with anti-fingerprint-coating

### What are the features of the tabi dispenser?

With the tabi dispenser, sanitary towels and tampons can be refilled hygienically in public sanitary facilities. A single output allows a sustainable use as needed. The stainless steel surface with anti-fingerprint-coating is both durable and hygienic – ideal for sanitary facilities with high user frequency.

## Application

---

### Ideal single removal

In total, the tabi dispenser contains approx. 40 sanitary towels and approx. 160 tampons. These can be taken out individually as needed.

# tabi

### Quick refill

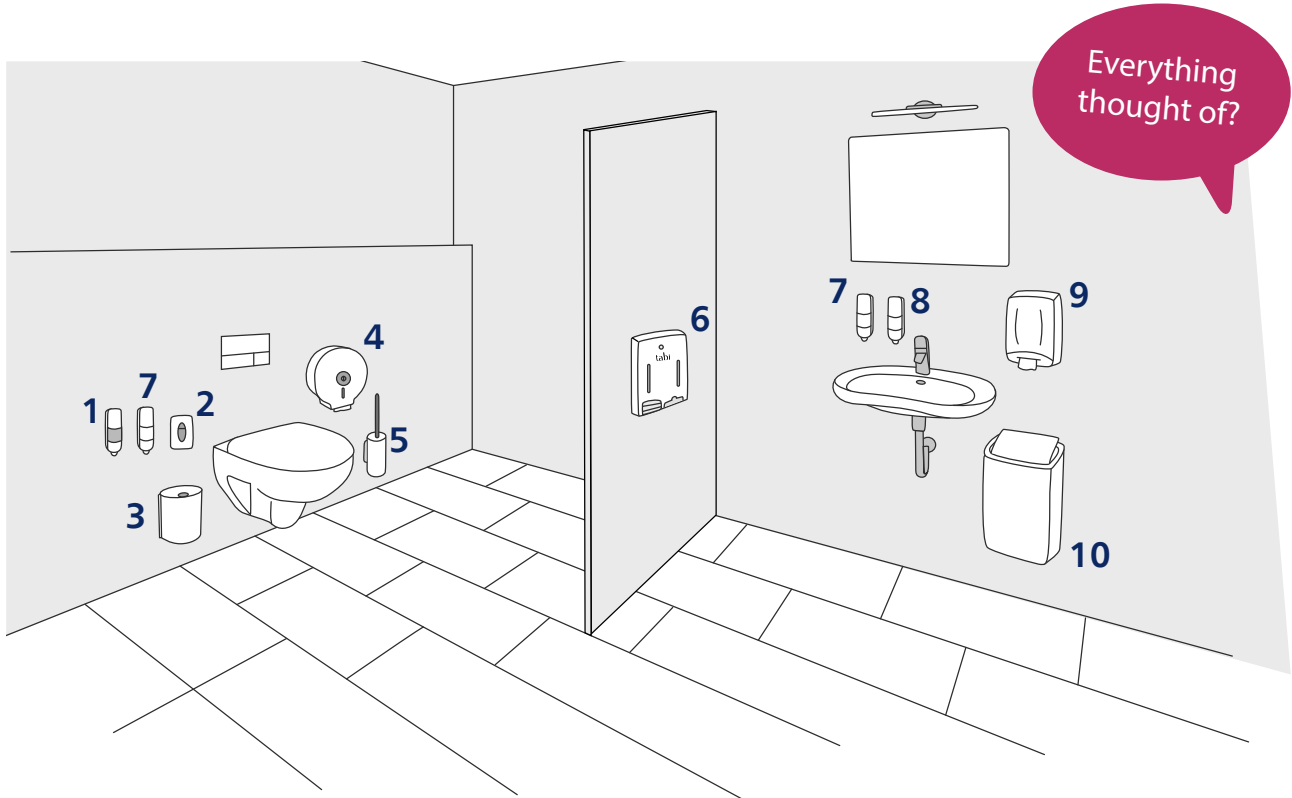

The service staff closes the high-quality processed front flap and can insert and pour in new filling material.

### Hygienic and safe

The stainless steel surface with anti-fingerprint-coating is both robust and hygienic. A lock prevents filling from being removed by unauthorized persons.

- 6 Tampons and sanitary towels dispenser
- 7 Hand disinfection dispenser
- 8 Soap dispenser
- 9 Towel paper dispenser
- 10 Waste bin

## Free access to period products – increase hygiene!

---

Many women do not have the financial means to equip themselves with the necessary hygiene products during their periods.

Free accessible menstrual products should be part of standard equipment in every sanitary facility, just like toilet paper and hand soap.

In situations when the period unexpectedly starts, a well-equipped sanitary facility provides additional value for all users.
